

VP-110

- Color: Purple
- Motor Octane 107
- Research Octane: 113
- R+M/2: 110
- Specific Gravity: .720-.735 at 60° F

C12

- Color: Green
- Motor Octane 108
- Specific Gravity: .717 at 60

U4.2

- Color: Blue
- Motor Octane: 102
- Specific Gravity: .784 at 60° F

U4.4

- Color: Light Green
- Motor Octane: 103
- Specific Gravity: .763 at 60° F

MRX01

- Color: Pink
- Motor Octane: 98
- Specific Gravity: .717 at 60° F

Blue Haze 110

 Motor Octane..... 109
 Research Octane.. 113
 Specific Gravity.... .728
 RVP..... 8
 Leaded
 Color: Purple

The Renegade Racing Fuels - Pro and Moto Series are more than a standard racing fuel. These fuels incorporate supreme chemical technology and a additive package in the Moto Series that will keep rubber parts from swelling, prevent that sticky residue from forming and keep engine parts cleaner than any other fuel on the market. They will also not only protect your investment, but also give you the ultimate winning edge. As most standard racing fuels have the same motor octane (mon) and specific gravity, engine builders recognize the different properties within the Renegade Racing Fuels – Pro and Moto Series. Whether you race motorcycles, karts, ATV's, snowmobiles, or boats, the Renegade Racing Fuels - Pro Series or Moto Series has the right fuel for your application. Renegade Moto Fuels are used by GEICO Factory Connection, Star Yamaha, Honda of Troy, and Suzuki City, and Monster Energy Leading Edge Kawasaki. What are you waiting on!
